Yuvraj Soni

FULL STACK / MEAN STACK DEVELOPER (Angular | Node.js | MongoDB | RxJS | NgRx | REST APIs | AWS)
+91-9785113836 | yuvrajsoni92@gmail.com
linkedin.com/in/yuvraj-soni-9aa765107/ | Banswara, Rajasthan

PROFESSIONAL SUMMARY

Full Stack Developer with 6.8 years of experience specializing in the MEAN Stack (MongoDB, Express.js, Angular, Node.js). Experienced in architecting and developing scalable, high-performance web applications across e-commerce, fintech, and hospitality domains. Skilled in frontend and backend development, RESTful API design, microservices architecture, and automated deployments. Proficient in Angular 14+, RxJS, NgRx, and Node.js for building responsive, modular, and maintainable enterprise applications.

TECHNICAL SKILLS

Frontend: Angular (v2–v17), TypeScript, RxJS, NgRx, HTML5, CSS3, PrimeNG, Angular Material.
Backend: Node.js, Express.js, RESTful APIs, Microservices, PHP, Laravel.
Database: MongoDB, MySQL.
DevOps & Tools: Git, GitHub, VS Code, Postman, Azure, AWS (basic), Agile/Scrum

---

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS)

Full Stack / MEAN Stack Developer | *Dec 2022 – Present* | Indore, India
Domain: Cruise Line Hospitality | www.tcs.com

- Led end-to-end development of the Cruise Personnel System Admin Panel using Angular 15, PrimeNG, and Node.js, delivering a modular, scalable, and high-performing enterprise UI for multi-department operations.
- Engineered an Airtable-like reporting module with advanced grid functionalities — dynamic grouping, inline editing, cloning, custom filters, and real-time configuration sync — optimized with Angular change detection and lazy data rendering.
- Architected a component-driven frontend structure with lazy loading, shared modules, and NgRx-based state management.
- Developed secure RESTful APIs using Node.js, Express.js, and MongoDB for user roles, reporting, and live data synchronization between distributed systems.
- Designed and integrated a unified communication layer between frontend and backend with token-based authentication and interceptor-driven error handling to ensure data consistency and resilience.
- Actively participated in Agile ceremonies, contributing to sprint planning, code reviews, and performance testing while maintaining a high standard of code quality through strict adherence to Angular best practices and coding guidelines.

Xsilica Software Solutions Pvt. Ltd.

Full Stack Developer (Angular + Node.js) | *Sep 2021 – Nov 2022* | Hyderabad, India
Domain: Fintech – Payment Gateway | www.xsilica.com

- Developed and maintained the PayG Merchant Dashboard, a real-time transaction analytics and settlement management platform using Angular 12, Node.js, and Angular Material, improving transaction visibility and reducing downtime for merchant partners.
- Designed and integrated RESTful APIs for payment reconciliation, reporting, and payout scheduling, ensuring secure data exchange between frontend and backend.
- Built reusable Angular components and implemented RxJS-based state management to reduce redundant code and improve maintainability across dashboard modules by 40%.
- Implemented JWT-based authentication and role-based access control, enhancing application security and compliance with fintech standards.
- Collaborated with QA and backend teams in Agile sprints to ensure high-quality, timely releases, and optimized build performance using Angular CLI and lazy loading. Mentored junior developers, conducted peer reviews, and improved overall code quality through the adoption of Angular coding standards and Git version control best practices.

Ooze IT Solutions Pvt. Ltd.
Angular Developer | *Jul 2019 – Aug 2021* | Udaipur, India
Domain: eCommerce (Healthcare) | www.itooze.com

- Developed and maintained the HPFY.com Admin Panel, a centralized management system powering 10+ healthcare eCommerce websites, using Angular for the frontend and .Net for backend APIs. Ensured seamless cross-site functionality and consistent user experience across all portals.
- Engineered and optimized modules for product catalog, coupon management, checkout workflows, and report generation, improving business operations and reducing manual data handling0020through automation and well-structured APIs.
- Designed and integrated RESTful APIs that enhanced inter-service communication between Angular and .Net layers, resulting in faster data synchronization and improved platform scalability for future enhancements.
- Collaborated cross-functionally with QA engineers and product owners to identify critical issues early, implement fixes proactively, and reduce release turnaround time by streamlining the UAT and deployment process.
- Supported continuous improvement by refactoring legacy code, introducing modular architecture, and maintaining coding standards across multiple development teams.

PROJECT HIGHLIGHTS

Microsoft Airtable Clone (Cruise Personnel System) – TCS
Built a complex, configurable data management module replicating Airtable features.
Tech Stack: Angular 15, PrimeNG, RxJS, NgRx, PrimeNG, Node.js, Express.js, MongoDB.

- Developed a dynamic data management module replicating Airtable-like functionality, including grouping, inline editing, and configuration sharing for enterprise-scale workflows.
- Implemented a modular architecture with lazy loading and NgRx-based state management, enhancing scalability, maintainability, and system reliability.

PayG Merchant Dashboard – Xsilica
Secure dashboard for merchants to manage transactions and settlements.
Tech Stack: Angular 12, Node.js, Express.js, Angular Material, MongoDB.

- Built a real-time fintech merchant dashboard for transaction tracking, settlements, and payout analytics with secure RESTful API integration.
- Created reusable Angular components and RxJS-based services, improving modular design and ensuring smooth API-driven performance.

HPFY.com Admin Panel – Ooze IT
Centralized admin tool for managing multiple eCommerce websites.
Tech Stack: Angular 7, TypeScript, ASP.NET, MySQL.

- Developed a centralized admin panel to manage multiple eCommerce healthcare portals with product, coupon, and reporting modules.
- Streamlined data communication between Angular and .NET APIs, improving operational efficiency and platform stability.

EDUCATION

Master of Computer Applications (MCA)
Janardan Rai Nagar Rajasthan Vidyapeeth, Udaipur (2016–2018)

Bachelor of Computer Applications (BCA)
Mohanlal Sukhadia University, Udaipur (2011–2016)

KEY ACHIEVEMENTS

- Designed and developed an Airtable-like data grid from scratch at TCS, demonstrating full ownership, innovation, and front-end architectural expertise.
- Enhanced backend performance and system stability through API optimization, caching, and refactoring of critical modules in full stack projects.
- Delivered multiple enterprise-grade applications across domains with consistent sprint success and earned recognition as “Star of the Sprint” for technical excellence and collaboration.
