7 Years	4+ Apps	5+ Depts
Years of Full Stack Ownership	Enterprise Applications Delivered	Operational Depts Impacted

PROFESSIONAL SUMMARY

Full Stack Engineer with 7 years of end-to-end product ownership on the MEAN Stack — Angular, Node.js, Express.js, MongoDB — across fintech, global cruise line hospitality, and healthcare eCommerce domains. At Tata Consultancy Services, owns both frontend and backend of an enterprise Crew Personnel System for a Fortune 500 global cruise brand: architecting scalable Angular SPAs, designing stateless RESTful Node.js APIs, and modeling MongoDB schemas for concurrent multi-user operations. Deep expertise in component-driven frontend architecture (Angular Signals, OnPush, Lazy Loading) and API-layer design (JWT, RBAC, middleware pipelines). Practices SOLID principles, writes modular maintainable code, and has a consistent track record of reducing technical debt while shipping features on schedule. Recognized as Star of the Sprint at TCS for engineering innovation and full-ownership delivery. Seeking a senior full stack role at a product-first company where I can own features across the full engineering stack.

TECHNICAL SKILLS

Frontend: Angular 2–17 · Signals · Standalone Components · OnPush Change Detection · RxJS · NgRx · Lazy Loading · @defer · Tree-shaking · Bundle Optimization · Core Web Vitals · PrimeNG · Angular Material · TypeScript (Strict)

Backend: Node.js · Express.js · RESTful API Design · Stateless Architecture · Middleware Pipelines · JWT Authentication · RBAC · API Versioning · Request Validation · Error Handling · Async/Await

Database: MongoDB (Schema Design · Compound Indexing · Aggregation Pipelines) · Mongoose ODM · MySQL · Query Optimization

Architecture: SOLID Principles · Modular Monolith · Microservices Concepts · Event-Driven Patterns · Component-Driven Design · Separation of Concerns · Repository Pattern

Testing & Quality: Jasmine · Karma · Unit Testing · API Testing (Postman) · Code Reviews · PR Standards

DevOps & Tooling: Git · GitHub · Azure DevOps · Docker (basic) · AWS (basic) · CI/CD Pipelines · Agile/Scrum

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) Dec 2022 – Present · Indore, India

Senior Full Stack Engineer (MEAN Stack) *Domain: Global Cruise Line Hospitality — Enterprise Crew Personnel System*

- **End-to-End Product Ownership:** Sole full stack owner of Cruise Personnel System (CPS) Admin Panel for a Fortune 500 global cruise brand — owned Angular frontend architecture, Node.js/Express API design, MongoDB data modeling, and production releases end-to-end across a 2+ year engagement.
- **Signature Feature — Airtable-like Data Grid:** Designed and shipped a fully configurable enterprise reporting module from scratch — Angular frontend (dynamic grouping, inline editing, row cloning, custom filters) + Node.js backend APIs + MongoDB persistence — handling 10,000+ record datasets with virtual scrolling, adopted by 5+ departments as the primary operations reporting tool.
- **Scalable Frontend Architecture:** Architected feature-module Angular SPA with OnPush change detection, route-level lazy loading across 12+ modules, and RxJS-driven service layer — reducing initial load time by ~40% and improving Core Web Vitals for enterprise concurrent users.
- **Backend API Design:** Engineered 15+ stateless REST API endpoints (Node.js/Express/MongoDB) for user management, reporting, permissions, and real-time data sync — designed for horizontal scalability with optimized MongoDB indexes for read-heavy admin workflows.
- **Auth & Security:** Built end-to-end JWT auth flow with refresh token handling, Angular interceptors, and server-side RBAC middleware enforcing fine-grained access control across 5+ user roles — securing sensitive enterprise personnel data in production.
- **Engineering Standards:** Authored team coding standards (Angular + Node.js); reviewed 100+ PRs; mentored 2 junior developers — improving code consistency and reducing bug-introduction rate across sprints.
- ★ **Star of the Sprint (TCS)** — Full ownership, engineering innovation, and delivery excellence across the CPS platform.

Xsilica Software Solutions Pvt. Ltd. Sep 2021 – Nov 2022 · Hyderabad, India

Full Stack Developer (Angular + Node.js) *Domain: Fintech — Payment Gateway & Merchant Analytics*

- **Full Stack Merchant Dashboard:** Delivered PayG Merchant Dashboard end-to-end — Angular 12 frontend with real-time transaction visualization + Node.js/Express REST APIs for payment reconciliation, payout scheduling, and settlement reporting in a live fintech platform.
- **Security Layer:** Implemented full-stack JWT auth + RBAC — Angular route guards (frontend) and Express middleware (backend) — securing merchant access to sensitive payment data across multiple user roles per fintech compliance requirements.
- Reduced frontend code redundancy by 40% through shared Angular component library and reactive service architecture; mentored 2 junior engineers on full stack best practices.

Ooze IT Solutions Pvt. Ltd. Jul 2019 – Aug 2021 · Udaipur, India

Full Stack Developer *Domain: Healthcare eCommerce (US Market)*

- **10+ Portal Platform:** Built and maintained HPFY.com Admin Panel — Angular SPA powering centralized management of 10+ US healthcare eCommerce portals with product catalog, coupon engine, order management, and cross-portal reporting.
- Modernized Angular codebase from monolithic to feature-module architecture; refactored REST API integration layer reducing payload overhead and improving admin panel data-load times.

KEY PROJECTS

Airtable-like Enterprise Data Grid — Cruise Personnel System · TCS · 2022–Present

Tech: *Angular 15 · PrimeNG · RxJS · NgRx · Node.js · Express.js · MongoDB · JWT*

- Full stack ownership: MongoDB schema + aggregation pipeline design → Node.js/Express REST API layer → Angular PrimeNG UI with virtual scrolling.
- Capabilities: dynamic multi-level grouping, inline editing, row cloning, custom filter chains, real-time config save/share — 10,000+ row datasets, zero-lag UX.
- Business impact: replaced manual spreadsheet workflows for 5+ operational departments; became primary reporting interface for crew operations.

PayG Fintech Merchant Dashboard · Xsilica · 2021–2022

Tech: *Angular 12 · Angular Material · Node.js · Express.js · MongoDB · JWT · RBAC*

- End-to-end fintech SPA: real-time transaction monitoring + reconciliation/payout APIs with JWT auth and RBAC-secured access — 40% code redundancy reduction through shared component architecture.

HPFY Multi-Portal Admin System · Ooze IT · 2019–2021

Tech: *Angular 7–9 · TypeScript · ASP.NET API Integration · MySQL*

- Centralized admin platform powering 10+ US healthcare eCommerce portals — product, coupon, order, and reporting modules.

EDUCATION

Master of Computer Applications (MCA) 2016 – 2018

Janardan Rai Nagar Rajasthan Vidyapeeth, Udaipur

Bachelor of Computer Applications (BCA) 2011 – 2016

Mohanlal Sukhadia University, Udaipur

CERTIFICATIONS & RECOGNITION

- MEAN Stack Development — Udemy | Angular · Node.js · Express.js · MongoDB
- Star of the Sprint — Tata Consultancy Services | Innovation & Full Stack Delivery Excellence
- Actively upskilling: NestJS · Angular Signals architecture · Docker · Redis caching · Micro-frontend (Module Federation) · Cypress E2E testing.
